

Stages for Adapting Media in Church							
	Print	Web	Lyric Projection	Projection Content	Video	Sound	
Start	Word, Works	Simple one-page HTML website	Hymn Books, Chorus Books	Solid Color or Gradient for songs on screen	Utilize pre-made sermon illustrations (sermonspice.com)	Preach Loudly	
	Page Layout Software like MS Publisher. Graphics are clickart.	Microsoft FrontPage Website.	Overhead Transparency projector	Still images as background	Form illustrations from popular, secular movie clips (CAUTION!)	Megaphone or Bullhorn	
	Advanced Page Layout Software like Adobe InDesign. Graphics are Stock Images.	Professional Web Editing application, such as Adobe Dreamweaver.	Computer and Projector, use Microsoft PowerPoint.	Motion Backgrounds	Make your own videos (on all levels)	Source (Mic) --> Mixer--> Speakers	
	Full-Color Postcard Invites. Digital Juice Juicedrops for stock backgrounds.	Content Management System (CMS) such as Joomla!, E-zekiel	Use Professional Stock Backgrounds, such as Digital Juice Presenter's Toolkit.	IMAG Background (Proceed w/ Caution)	Integrate videos for all purposes: Announcements, Sermon Intros, Sermon Illustrations	Hire an acoustical company for best speaker placement and setup, including acoustical panels.	
	Print Full-Color bulletins (full-color shells can be cost-effective)		Use Presentation Software such as EasyWorship, SongShowPlus or LiveWorship(Mac)	Assortment of everything that artisticly supports the worship			
			Video Toaster, Spyder
